

# An Updated Checklist of Bryophytes of Karnataka

Uwe Schwarz

*Abstract: SCHWARZ, U. (2013): An Updated Checklist of Bryophytes of Karnataka.*

During the analysis of collections made by the author and company in Madikeri (Coorg) district the need of an updated checklist became eminent. Literature studies were carried out alongside with the identification of specimen. Liverworts were added to the existing checklist of mosses of Karnataka. Location information of previous publications has been critically revised and reflected in the current list. An extended history of the bryological exploration of the state of Karnataka is given.

## 1. Introduction

Karnataka is one of the southern states of India. It borders the Arabian Sea to the west, Maharashtra to the north, Andhra Pradesh and Telangana to the east, Tamil Nadu to the south east and Kerala to the south west. It covers an area of more than 190,000 square kilometres and got a population of approximately 61 million.

From east to west there are 3 geographical regions – the coastal region, the Western Ghats and the Bayaluseeme region comprising the plains of the Deccan plateau. The majority of the state is part of the Bayaluseeme region that stretches for 150 to 200 km from the eastern foot of the Western Ghats to the state borders in the east. Due to its arid nature this region was hardly visited by bryologists.

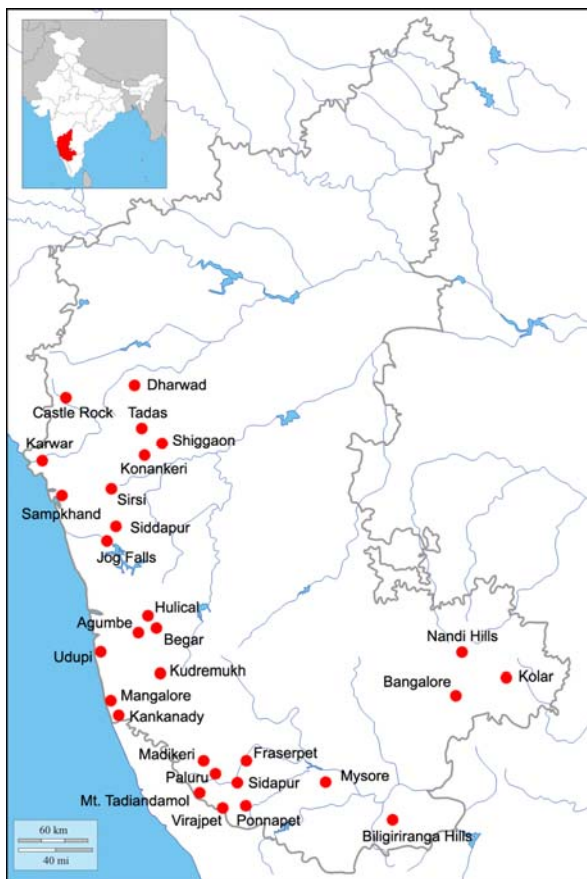

The climate is influenced by the monsoon, providing seasonal rainfalls with a gradient from about 3500 mm in the west, with maximums up to 5000 mm, to 5-600 mm in the east. The temperatures vary accordingly between an average of 27° along the coast and much higher temperatures but under drier conditions in the interior.

## 2. Exploration of the Bryoflora of the State of Karnataka

Even though the coastal plains and the mountains of the Western Ghats hold a rich flora the state of Karnataka has never been in focus for intensive bryological research. Records are usually based on occasional visits of botanists and bryologist in the known, botanical interesting areas. Figure 1 shows the localities of bryological research.

The first record of bryophytes in the state of Karnataka dates back to October 1892 when G.A. GAMMIE collected *Bryum argenteum* var. *australe* REHMANN ex DIXON at Castle Rock (Uttara Kannada district). This record was referred to in several publications, e.g. SEDGWICK, L.J. 1913. GAMMIE was at that time in charge of the Lloyd Botanic Garden in Darjeeling before he took up curatorship of the herbarium of the Calcutta Royal Botanic Gardens and took later on government posts in Bombay and Pune.

It was A.E. LOWRIE who contributed next to the bryoflora of the state. In 1895 and 1896 he collected a few mosses in Coorg (Madikeri). Specimen of *Fimbraria angusta* STEPHANI, *Lejeunea*

**Figure 1** Bryological collection localities

*lowriana* STEPHANI and *Leucobryum imbricatum* BROTH. are deposited in the herbaria of Geneva (G) and Paris (PC). These samples were very likely taken during the preparation of a progress report of the forest administration in Coorg in 1895 – 96.

The first major collection from the area, consisting of more than 300 numbers, originates from T.L. WALKER who visited Coorg in December 1897 and January 1898. BROTHERUS 1899 published the result, describing more than 20 new taxa new to science of which around 10 are still valid. WALKER was assistant superintendent of the Geological Survey of India from 1897 – 1901. He used the time during geological field work in with T.H. HOLLAND to carry out his botanical studies in Coorg.

I. PFLEIDERER, a South West German / Swiss missionary worked as a teacher at the Mission High School in Mangalore. His bryophyte collections dated from 1905 – 1911 origin mostly from the vicinity of Mangalore but he collected in Coorg, Kudremukh and Udupi as well. His specimen can for instance be found in the herbaria of Geneva (G) and Paris (PC).

R.M. MAXWELL, a member of the Indian Civil Service, collected in 1908 and 1909 in the north western part of Karnataka. During that time the “Kanara Jungles” were part of the Bombay presidency. References to his specimen can be found in DIXON 1909 and SEDGWICK 1910. Even though MAXWELL lived in India from 1907 – 1944 he only used his early years in India for botanical studies.

L.J. SEDGWICK was as MAXWELL a member of the Indian Civil Service working as an Indian census superintendent. Apart from his collection of vascular plant he also collected bryophytes, mostly in today’s state of Maharashtra. His moss collections between 1907 and 1919 were initially published by himself in SEDGWICK 1910, SEDGWICK 1911 and SEDGWICK 1913. A substantial number of records from the Kanara District that are based on SEDGWICKS collections from October 1919 were identified and published in DIXON 1921.

G. FOREAU contributed to the bryoflora of Karnataka with a few collections from the Mangalore area dating back to 1925 and 1926 and being published in DIXON & POTIER DE LA VARDE 1927. As a missionary at the Jesuit Sacred Heart College at Shembaganur in the Palni Hills his botanical studies focused mostly at that area in today’s state of Tamil Nadu. He published his discoveries of the bryoflora of Madras in FOREAU 1930 and 1931 as well as in his “Musci Madurenses Indiae Meridionalis Exsiccati”. His late works (FOREAU 1961 and 1964) cover the moss flora of the Palni Hills and South India.

A.R. RAO contributed with 2 specimens from Mangalore that were collected in 1938. Based at the University of Lucknow he worked closely together with BIRBAL SAHNI, one of Indias most

renowned paleobotanists. He is not identical with Prof. A.R. RAO working at the same institute who was only born in 1924.

S.K. PANDE intensified the research on diversified aspects of Bryophytes at the University of Lucknow in 1923 laying the corner stone of the high reputation of bryological research at this institution. His own works cover a time span from the early 1930s to the late 1950s mostly focusing on Liverworts. During his research he visited the Shimoga district at least in 1940 and 1950. Species as *Cephalozia pandei* UDAR & D. KUMAR, *Cololejeunea pandei* UDAR & G. SRIVAST., *Heteroscyphus pandei* S.C. SRIVAST. & A. SRIVAST., *Metzgeria pandei* S.C. SRIVAST. & UDAR, *Notoscyphus pandei* UDAR & AD. KUMAR, *Notothylas pandei* UDAR & V. CHANDRA and *Radula pandei* UDAR & KUMAR, DHIRENDRA are dedicated to him.

H.C. GANGULEE, the internationally renowned author of the “Mosses of Eastern India and Adjacent Regions”, was bryologically active between the 1950s till the early 1980s. He visited Bangalore in 1958 from where the only record from the area that can be assigned to him – *Barbula indica* (HOOK.) SPRENG. – was collected. Before he retired in 1979 he was head of the Department of Botany, University of Calcutta.

Between 1960 and 1964 it was R.S. RAGHAVAN, who contributed to the knowledge of the moss flora of the region. He mentioned 35 species from Shimoga District in RAGHAVAN & WADHWA 1968. Both were working for the Botanical Survey of India in Pune, where also their moss collection is kept. Apart from another article, RAGHAVAN & WADHWA 1970, no further collections of bryophytes have been made by the authors.

Apart from collection in the United Kingdom C.C. TOWNSEND contributed to bryology with a lot of collections that were made abroad. Those originate for instance from northern and tropical Africa, Canary Islands and western Asia. In 1973 he visited the Nandi Hills, approximately 50 km north to Bangalore during a botanical field trip with colleagues from Britain and India. He published his results in TOWNSEND 1988. The 32 records give a very good indication of the moss flora of south eastern Karnataka.

Between the mid of the 1970s and end of the 1980s there were regular visits by bryologists of the department of botany from the University of Lucknow. It was G. ASTHANA, U.S. AWASTHI, V. CHANDRA, A. KUMAR, D. KUMAR, V. NATH, D SHARMA, S.C. SRIVASTAVA and R. UDAR who visited the bryologically interesting areas like Agumbe, Coorg and Kudremukh. The records were published in various papers as well in PhD thesis and it can be assumed that there are more unpublished records of species in particular deposited in the herbarium at Lucknow.

Despite the close proximity of the state of Kerala, bryologist from this state hardly visited the area. It was only K.P. RAJESH who contributed *Bryum tuberosum* MOHAMED & DAMANHURI to the list.

A valuable contribution might have been provided by V.C. BATH who worked on mosses of the Western Ghats and the coastal belt of Karnataka (BATH 2009). According to the university staff the thesis hasn't been published yet and a copy could therefore not be provided.

The author itself started his bryological investigation in 2012 during his assignment to the IT department of Mercedes-Benz in India. IT colleagues like H. WINKELMANN and BHARGAV RAM accompanied him to locations in Coorg and Biligiriranga Hills. A major collection was done during field trips with J.-P. FRAHM and F. SCHUMM to Coorg in 2012 – the later a lichenologist who studied the lichen flora of that area. The preliminary results were published in SCHWARZ and FRAHM 2013. One of the most interesting findings was the discovery of a *Phycolepidozia* species – a leafless Cephaloziellaceae from Mt. Tadiandamol. A publication is in preparation.

#### 4. Methodology

The lists are divided by Anthocerotae, Hepaticae and Musci. Whenever possible primary literature was evaluated. All records found in secondary literature were mentioned as well, even if the respective data from primary sources was already cited.

The evaluation of the taxonomical status is following TROPICOS in most of the cases. A critical judgment of possible miss identification was not executed and will be subject to future studies.

Family, genus and taxa numbers for the states of Kerala and Tamil Nadu were calculated after taxonomical adjustments.

The following locations mentioned in previous publications to hold bryophyte records for the area don't belong to the state of Karnataka and were excluded from the list:

- Panchgani – State of Maharashtra, Satara district
- Lonavla – State of Maharashtra, Pune district
- Mahabaleshwar – State of Maharashtra, Satara district

## 5. Anthocerotae

### 1. *Anthoceros bhavadwajii* UDAR & A. K. ASTHANA (Anthocerotaceae)

Jog Falls - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. UDAR ET AL. 6343/82 (LWU), 09/1982]; Karnataka - SINGH, DEY, SINGH 2010

### 2. *Anthoceros indicus* STEPHANI (Anthocerotaceae)

Mysore - BAPNA & KACHROO 2000a

*Anthoceros notothyloides* STEPHANI = *Anthoceros subtilis* STEPHANI

### 3. *Anthoceros subtilis* STEPHANI (Anthocerotaceae)

Mangalore - [Coll./herb. no. PFLEIDERER, I. 60883 (G), 09/1906] [Coll./herb. no. PFLEIDERER, I. 60882 (G), 08/1907] - ASTHANA & SRIVASTAVA 1991 (as *Anthoceros notothyloides*) [Coll./herb. no. PFLEIDERER, I. 12822 (G - Type), 09/1906] [Coll./herb. no. PFLEIDERER, I. 12823 (G - Type), 08/1907] - BAPNA & KACHROO 2000a (as *Anthoceros notothyloides*)

*Aspiromitus mangaloreus* STEPHANI = *Folioceros mangaloreus* (STEPHANI) D.C. BHARDWAJ

### 4. *Folioceros dixitianus* (MAHAB.) D.C. BHARDWAJ (Anthocerotaceae)

Castle Rock - BAPNA & KACHROO 2000a

### 5. *Folioceros mangaloreus* (STEPHANI) D.C. BHARDWAJ (Anthocerotaceae)

Agumbe - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. PANDÉ, S.K. 5020/51, 5022/51 (LWU), 08/02/1951] - BAPNA & KACHROO 2000a; Mangalore - [Coll./herb. no. PFLEIDERER, I. 69645 (G), 08/1907] - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. PFLEIDERER, I. 14577 (G)] - BAPNA & KACHROO 2000a

### 6. *Notothylias dissecta* STEPHANI (Notothyliadaceae)

Agumbe - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. PANDÉ, S.K. 319 R/WG (LSU), 09/1950] - BAPNA & KACHROO 2000a

### 7. *Notothylias pandei* UDAR & V. CHANDRA (Notothyliadaceae)

Jog Falls - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. R. UDAR; V. CHANDRA NS528 (LWU), 10/1962] - BAPNA & KACHROO 2000a

**8. *Notothylas pflidereri* UDAR & D.K. SINGH (Notothyladaceae)**

Mangalore - ASTHANA & SRIVASTAVA 1991 [Coll./herb. no. PFLEIDERER, I. 12823 (G), 08/1907] - UDAR & SINGH 1979a [Coll./herb. no. PFLEIDERER, I. 12823 (G - p.p.), 08/1907]

**9. *Phaeoceros laevis* (L.) PROSK. (Anthocerotaceae)**

Kabbinakad - SCHWARZ & FRAHM 2013; Karnataka - SINGH, DEY, SINGH 2010 - SINGH & SINGH 2007

**6. Hepaticae****1. *Acanthocoleus yoshinaganus* (S. HATT.) KRUIJT (Lejeuneaceae)**

Madikeri - BAPNA & KACHROO 2000b

**2. *Archilejeunea apiculifolia* STEPHANI (Lejeuneaceae)**

Kudremukh - [Coll./herb. no. PFLEIDERER, I. 67057 (G), 04/1911] - BAPNA & KACHROO 2000b - VERMA & SRIVASTAVA 2011

*Archilejeunea indica* STEPHANI = *Schiffneriolejeunea pulopenangensis* (GOTTSCHE) GRADST.

*Archilejeunea mariana* (GOTTSCHE) STEPHANI = *Cheilojeunea mariana* (GOTTSCHE) B. THIERS & GRADST.

**3. *Asterella khasiana* (GRIFF.) GROLLE (Aytoniaceae)**

Karnataka - SINGH, DEY, SINGH 2010

**4. *Asterella leptophylla* (MONT.) GROLLE (Aytoniaceae)**

Mysore - VERMA & SRIVASTAVA 2011

*Asterella mercarana* (STEPHANI) KACHROO & BAPNA = *Asterella wallichiana* (LEHM.) GROLLE

*Asterella mysorensis* (KASHYAP) KACHROO & BAPNA = *Asterella wallichiana* (LEHM.) GROLLE

**5. *Asterella wallichiana* (LEHM.) GROLLE (Aytoniaceae)**

Agumbe - BAPNA & KACHROO 2000b (as *Asterella mercarana*); Kabbinakad - SCHWARZ & FRAHM 2013; Karnataka - SINGH, DEY, SINGH 2010 - SINGH & SINGH 2007; Kodagu (Coorg) - [Coll./herb. no. PFLEIDERER, I. 67382 (G), 10/1906]; Madikeri - BAPNA & KACHROO 2000b (as *Asterella mercarana*); Mysore - BAPNA & KACHROO 2000b (as *Asterella mysorensis*)

**6. *Bazzania ovistipula* (STEPHANI) ABEYW. (Lepidoziaceae)**

Karnataka - SINGH, DEY, SINGH 2010; Kudremukh - BAPNA & KACHROO 2000a - MIZUTANI 1967a [Coll./herb. no. PFLEIDERER, I. 11187 (G), 04/1911] - SHARMA & SRIVASTAVA 1993

**7. *Bazzania pusilla* (STEPHANI) S. HATT. (Lepidoziaceae)**

Kudremukh - [Coll./herb. no. PFLEIDERER, I. 67258 (G), 04/1911]

**8. *Caudalejeunea pluriplicata* UDAR & U.S. AWASTHI & SHAHEEN (Lejeuneaceae)**

Agumbe - UDAR, AWASTHI, SHAHEEN 1982 [Coll./herb. no. D. KUMAR, A. KUMAR, U.S. AWASTHI 4732/81 (LWU), 1981] - VERMA & SRIVASTAVA 2011 [Coll./herb. no. D. KUMAR, A. KUMAR, U.S. AWASTHI 4732/81 (LWU), 1981]

**9. *Caudalejeunea reniloba* (GOTTSCHE) STEPHANI (Lejeuneaceae)**

Agumbe - BAPNA & KACHROO 2000b

**10. *Cephaloziella kiaeri* (AUSTIN) S.W. ARNELL (Cephaloziellaceae)**

Kabbinakad - SCHWARZ & FRAHM 2013

*Chandonanthus birmensis* STEPHANI = *Mastigophora diclados* (BRID. EX F. WEBER) NEES

**11. *Cheilolejeunea birmensis* (STEPHANI) MIZUT. (Lejeuneaceae)**

Agumbe - ASTHANA, SRIVASTAVA, ASTHANA 1995 [Coll./herb. no. D. KUMAR, A. KUMAR, U.S. AWASTHI 4716/81 (LWU), 03/05/1981] - BAPNA & KACHROO 2000b

**12. *Cheilolejeunea imbricata* (NEES) S. HATT. (Lejeuneaceae)**

Agumbe - ASTHANA, SRIVASTAVA, ASTHANA 1995 [Coll./herb. no. S.C. SRIVASTAVA; U.S. AWASTHI; D. SHARMA 8815/85 (LWU), 14/10/1985] - BAPNA & KACHROO 2000b

**13. *Cheilolejeunea laeviuscula* (MITT.) STEPHANI (Lejeuneaceae)**

Agumbe - ALAM 2012; Madikeri - ALAM 2012 - ASTHANA, SRIVASTAVA, ASTHANA 1995 [Coll./herb. no. D. KUMAR, A. KUMAR, U.S. AWASTHI 4616/81, 4658/81 (LWU), 01/05/1981]

**14. *Cheilolejeunea mariana* (GOTTSCHE) B. THIERS & GRADST. (Lejeuneaceae)**

Agumbe - BAPNA & KACHROO 2000b (as *Archilejeunea mariana*)

**15. *Cheilolejeunea rigida* STEPHANI (Lejeuneaceae)**

Madikeri - [Coll./herb. no. PFLEIDERER, I. 112873 (G), 10/1906] [Coll./herb. no. PFLEIDERER, I. 282945 (G), 10/1906]

**16. *Cheilolejeunea trapezia* (NEES) MIZUT. (Lejeuneaceae)**

Karnataka - SINGH, DEY, SINGH 2010

**17. *Cololejeunea appressa* (A. EVANS) BENEDIX (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6251/82, 6284/82, 6523/82, 6525/82, 6530/82 (LWU), 28/09/1982] [Coll./herb. no. D. KUMAR; A. KUMAR; U.S. AWASTHI 4731/81, 4747/81 (LWU), 04/05/1981] [Coll./herb. no. PANDÉ, S.K. 3879/50, 3880/50 (LWU), 15/10/1950] - VERMA 2009; Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6152/82, 6153/82, 6154/82, 6508/82, 6513/82, 6515/82, 6516/82, 6517/82, 6518/82, 6519/82 (LWU), 27/09/1982] [Coll./herb. no. PANDÉ, S.K. 3759/40, 3782/40, 4414/40, 4414/40, 4417/40, 4419/40 (LWU), 05/01/1940] - VERMA 2009; Karnataka - ASTHANA 2001

*Cololejeunea dentifolia* UDAR & G. SRIVAST. = *Cololejeunea gottschei* (STEPHANI) MIZUT.

**18. *Cololejeunea epiphylla* G. ASTHANA & A. SHUKLA (Lejeuneaceae)**

Megarvalli - ASTHANA & SHUKLA 2010 [Coll./herb. no. G. ASTHANA ET AL. 19762/06 (LWU)]

**19. *Cololejeunea floccosa* (LEHM. & LINDENB.) STEPHANI (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. PANDÉ, S.K. 3879/50, 3880/50 (LWU), 15/10/1950] [Coll./herb. no. D. KUMAR; A. KUMAR; U.S. AWASTHI 4731/81, 4755/81 (LWU), 04/05/1981] [Coll./herb. no. 6233/82, 6241/82, 6242/82, 6245/82, 6248/82, 6249/82, 6250/82, 6285/82, 6301/82, 6304/82, 6521/82, 6523/82, 6524/82, 6533/82, 6535/82 (LWU), 28/09/1982]; Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6508/82, 6516/82 (LWU), 27/09/1982]

**20. *Cololejeunea foliicola* S.C. SRIVAST. & G. SRIVAST. (Lejeuneaceae)**

Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. PANDÉ, S.K. 3781/40, 3786/40, 3788/40, 3793/40,

3794/40, 4797/40, 4414/40, 4434/40 (LWU), 05/01/1940] [Coll./herb. no. R. UDAR ET AL. 6150/82, 6151/82, 6152/82, 6153/82, 6154/82, 6155/82, 6513/82, 6514/82, 6517/82, 6518/82, 6519/82 (LWU), 27/09/1982] - BAPNA & KACHROO 2000b - VERMA & SRIVASTAVA 2011 [Coll./herb. no. R. UDAR ET AL. 6515/82 (LWU), 27/09/1982] [Coll./herb. no. R. UDAR ET AL. 6515/82 (LWU), 27/09/1982]; Karnataka - ASTHANA 2001; Madikeri - BAPNA & KACHROO 2000b

**21. *Cololejeunea furcilibulata* (BERRIE & E.W. JONES) R.M. SCHUST. (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. D. KUMAR; A. KUMAR; U.S. AWASTHI 4755/81 (LWU), 04/05/1981] - BAPNA & KACHROO 2000b; Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6508/82 (LWU), 27/09/1982] - BAPNA & KACHROO 2000b; Karnataka - ASTHANA 2001 - PÓCS, MANJU, RAJESH, MADHUSOODANAN 2007

**22. *Cololejeunea goebelii* (GOTTSCHKE EX K.I. GOEBEL) SCHIFFNER (Lejeuneaceae)**

Karnataka - ASTHANA 2001

**23. *Cololejeunea gottschei* (STEPHANI) MIZUT. (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. D. KUMAR; A. KUMAR; U.S. AWASTHI 4593/81 (LWU), 04/05/1981] - UDAR & SRIVASTAVA 1982 (as *Cololejeunea dentifolia*); Karnataka - ASTHANA 2001 (as *Cololejeunea dentifolia*) - SINGH, DEY, UPADHYAY 2010

**24. *Cololejeunea hasskarliana* (LEHM. & LINDENB.) STEPHANI (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6250/82 (LWU), 28/09/1982]; Karnataka - ASTHANA 2001 - SINGH, DEY, SINGH 2010; Mt. Tadiandamol - SCHWARZ & FRAHM 2013

**25. *Cololejeunea hyalina* G. ASTHANA & S.C. SRIVAST. (Lejeuneaceae)**

Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6516/82 (LWU), 27/09/1982] - VERMA & SRIVASTAVA 2011 [Coll./herb. no. R. UDAR ET AL. 6516/82 (LWU), 27/09/1982] [Coll./herb. no. R. UDAR ET AL. 6516/82 (LWU), 27/09/1982]

**26. *Cololejeunea karnatakensis* G. ASTHANA & S.C. SRIVAST. (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6241/82, 6242/82, 6250/82, 6303/82, 6524/82, 6527/82, 6530/82, 6533/82 (LWU), 28/09/1982]; Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6508/82 (LWU), 27/09/1982] - VERMA & SRIVASTAVA 2011 [Coll./herb. no. R. UDAR ET AL. 6516/82 (LWU), 27/09/1982] [Coll./herb. no. R. UDAR ET AL. 6516/82 (LWU), 27/09/1982]

**27. *Cololejeunea kashyapii* UDAR & G. SRIVAST. (Lejeuneaceae)**

Jog Falls - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6164/82 (LWU), 27/09/1982] [Coll./herb. no. PANDÉ, S.K. 3758/40, 3780/40, 3787/40 (LWU), 05/01/1940] - BAPNA & KACHROO 2000b - VERMA & SRIVASTAVA 2011 [Coll./herb. no. PANDÉ, S.K. 3775/40 (LWU), 05/01/1940] [Coll./herb. no. PANDÉ, S.K. 3775/40 (LWU), 05/01/1940]; Karnataka - ASTHANA 2001

**28. *Cololejeunea lanciloba* STEPHANI (Lejeuneaceae)**

Jog Falls - BAPNA & KACHROO 2000b

**29. *Cololejeunea latilobula* (HERZOG) TIXIER (Lejeuneaceae)**

Agumbe - ASTHANA & SRIVASTAVA 2003 [Coll./herb. no. R. UDAR ET AL. 6277/82 (LWU), 28/09/1982] -

**7. Discussion**

During the recent years checklists of the neighboring states of Kerala and Tamil Nadu (MANJU et al. 2008, DANIELS 2010) have been published providing now valuable data to judge the status of the bryoflora of Karnataka (Table 1).

Table 1: Number of Bryophyte families, genera and taxa per state

	Karnataka			Kerala			Tamil Nadu			3 States together		
	Fam	Gen	Taxa	Fam	Gen	Taxa	Fam	Gen	Taxa	Fam	Gen	Taxa
<b>Hornworts</b>	2	4	9	2	4	10	2	4	9	2	4	18
<b>Liverworts</b>	20	42	113	29	54	159	32	65	252	35	74	350
<b>Mosses</b>	35	97	216	41	140	302	50	192	472	52	235	682
<b>Total</b>	<b>57</b>	<b>143</b>	<b>338</b>	<b>72</b>	<b>198</b>	<b>471</b>	<b>84</b>	<b>261</b>	<b>733</b>	<b>89</b>	<b>313</b>	<b>1050</b>

In comparison with Kerala and Tamil Nadu it becomes obvious that Karnataka is a highly underexplored state. As indicated in chapter 2 the interest to execute bryological studies in the area was quite low. The exploration also just started about 70 years later than in Tamil Nadu, where B. SCHMID collected in the Nilgiri Hills in the 1830s (MÜLLER 1853).

From a biogeographical perspective the 3 states are very much alike. The share – at least in parts – similar climatic, geomorphological and floristic conditions. Even though the highest peaks in Kerala and Tamil Nadu reach an elevation of 2,695 and 2637 meters respectively, Karnataka is still holding a fair degree of montane flora.

It would be highly advisable to bring the state of Karnataka, in particular its mountainous regions, into the focus of bryological research which will not just lead to a better understanding of the bryoflora of southern India but will for sure also disclose additional bryological treasures.

## 8. Acknowledgments

I want to thank the members of the European Data Center of the Daimler Corp. for the logistical support, in particular Mr. A. KUMAR (Pune) for the help to get literature from the University in Pune. In addition I want to thank Prof. J.-P. FRAHM (Bonn) for his constructive comments and the encouragement during the field trips in India.
